DETAILED ACTION

Election/Restrictions

The examiner acknowledges applicant's election (Paper No. 7), without traverse, of the claims of Group I, (claims 1-23) and the species as defined as the first species in claim 4 as the Group and species elected for prosecution, respectively. However, a new restriction requirement appears below. The examiner regrets the inconvenience, but in the interest of providing applicant with the reasonably complete and though search to which he is entitled, a new restriction requirement is in order

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, drawn to polyamines, classified in class 564, subclass: various.
- II. Claims 17-23, drawn to the use of the above amines in the treatment of diseases, classified in class 514, subclass: various.
- III. Claims 24-31, drawn to porphyrines and their method of use, classified in class 540, subclass 145.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II (claims 1-23) and III (claims 24-31) are distinct for reasons of record (Paper No.4).

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, (1) above applies. The diseases of the claims may be treated with other compounds which are not applicant's compounds. For instance, the compound taxol A, used in the treatment of cancers, is not a conformationally restricted amine.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

The examiner states for the record that if any compound claims during the course of the prosecution are determined to be allowable, the examiner would be amenable to rejoining method claims commensurate in scope.

Claims 1-31 are generic to a plurality of disclosed patentably distinct species comprising the compounds defined individually in the claims. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

Art Unit: 1621

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian J. Davis whose telephone number is 703-305-7129. The examiner can normally be reached on 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann Richter can be reached on 703-308-4532.
